**DETAILED ACTION**  
***Election/Restrictions***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1-19, drawn to an exchange system for buying and selling steel.

Group II, claim(s) 20-21, drawn to an exchange module including a practice field module.

Group III, claim(s) 22, drawn to a commodity exchange including dynamic transaction filters.

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a practice field module. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Art Unit: 3625

Inventions I and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention III has separate utility such as Inventions I and II are related as subcombinations disclosed as usable together in a single combination. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

matter, restriction for examination purposes as indicated is proper. See MPEP § 806.05(d).

This application contains claims directed to the following patentably distinct species of the claimed invention:

Group IA – 1,2

Group IB – 1,3

Group IC – 1,4

Group ID – 1,5

Group IE – 1,6,7,11,12,14

Group IF – 1,,6,7,13,14

Group IG – 1,1,6,7,8,15,9,14

Group IH – 1,1,6,7,8,16,17,9,14

Group IJ – 1,1,6,7,8,16,18,9,14

Group IK – 1,1,6,7,8,19,9,14

Group IL – 1,1,6,7,8,15,10,14

Group IM – 1,1,6,7,8,16,17,10,14

Group IN – 1,1,6,7,8,16,18,10,14

Group IO – 1,1,6,7,8,19,10,14

Applicant is required under 37 CFR 1.146 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, 1,20 and 22 generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.
